Journeys in the Genetic Jungle
British Society for Gene Therapy
Public Open Day
Monday 19th March 2007
Ramphal Building, University of Warwick

“We aim to provide an opportunity to discuss and debate gene and cell therapy research with scientists, patients, journalists and clinicians, and to think about the impact that this research has on society and you”

Chaired by Len Seymour, Tom Southgate, & Renee Watson

9.30 Registration
9.45 Science, Genes and the Public
   Len Seymour
   Bob Williamson
   Richard Ashcroft

10.30 Can gene therapy be used to treat:
   - Haemophilia
   - Cystic Fibrosis
   Simon Waddington
   Uta Griesenbach

10.45 Refreshments
11.15 Can gene therapy be used to treat:
   - Cancer
   - Muscular Dystrophy
   Rachel Cowen
   George Dickson

12.30 Lunch, charity exhibition and microscope demonstration

13.30 Question time: your chance to discuss gene therapy with the experts:
   Richard Ashcroft, Rosie Barnes, James Robertson,
   Bob Williamson and Michael Antoniou

14.30 Science and the media
   Alok Jha

14.45 Do it yourself - parallel workshops investigating topics in gene therapy:
   When blood is thinner than water
   Adam Jones & Simon Waddington

   What’s happening in The Wild West Midlands?
   Hans-Gerhard Burgert

   Gene Therapy in the News
   Alok Jha & James Robertson

15.30 Refreshments & Close
